

The pink flowers from fireweed  
or River beauty can be used as a  
garnish for salads, desserts, or other  
dishes. They can also be made into  
a ruby syrup which is wonderful on  
pancakes.

*Fireweed*  
*Chamerion angustifolium*

**NOTE:** There are wild plants and greens that are toxic, so it is recommended to use a field guide and a trusted expert while learning. Please be mindful and respectful when harvesting wild plants.

Take the yellow petals off a dandelion head and mix them into cakes, scones, or even a homemade mustard.

*Dandelion*  
*Taraxacum officinale*

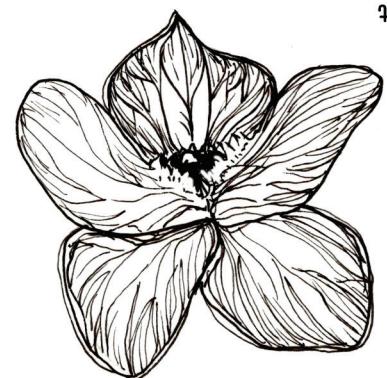

Makes a refreshing tea which you  
can freeze into popsicles. Mix the  
flowers into the dough of cookies or  
scones. You can also sprout the seeds  
to add to salads!

*Trifolium pratense*  
*Red Clover*

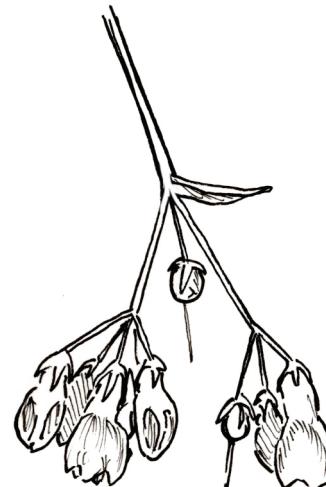

Add these lovely flowers as a garnish  
for salads or desserts. Just two  
violets fulfill your daily dose of  
vitamin C. They can also be made  
into a beautiful purple syrup or  
tincture (with purple violets)

*Violet*  
*Viola sp.*

**Wild Rose**  
*Rosa acicularis*

Heart-shaped rose are lightly astringent and will lift one's spirits in early summer. They are good in baked goods, teas, macerated in sugar, or in vinegars and honeys (or both for a nice shrub).

*Bluebell*  
*Mertensia paniculata*

These blue flowers are great to brighten up a salad or top a cake, especially next to some spicy orange nasturtiums from the garden.
